

MANUFACTURING MANAGEMENT

INTEGRATE PRODUCTION PLANNING WITH CUSTOMER MANAGEMENT AND FINANCIAL REPORTING

Acumatica, in partnership with JAAS Systems, offers a complete, multi-site manufacturing control and planning system for make-to-stock, make-to-order, engineer-to-order, project centric, job shop, batch, and repetitive manufacturing. The JAAS Advanced Manufacturing Software (JAMS) integrates with Acumatica's Financial Management, Distribution Management, Customer Management, and Project Accounting products.

- **Bill of Material and Routing** – Efficiently plan and manage inventories, costs, and manufacturing processes, as well as full revision control. See both engineering and financial views of product structure in the multi-level Bill of Material (BOM)/Routing screen.
- **Production Management** – Schedule production on the shop floor and track material and labor costs. Capture the total cost of manufacturing including material, labor, overhead, and outside processes. Create production orders from previous revisions and alternate bills of materials.
- **Material Requirements Planning (MRP)** – Satisfy customer requirements while maintaining optimal inventory levels with the powerful JAMS for Acumatica MRP planning tool.

KEY BENEFITS

COORDINATE ACTIVITIES

- Manage your entire business with complete, real-time information for your operations
- Coordinate labor, machines, and inventory and optimize your company's processes

AVOID OUTGROWING YOUR SOFTWARE

- Adapt the software as your business grows
- Leverage powerful features and functions for:
 - Make-to-Stock
 - Make-to-Order
 - Engineer-to-Order
 - Project Centric
 - Job Shop
 - Batch
 - Repetitive Manufacturing

MEET SCHEDULES

- Respond to demand while optimizing inventory and resources
- Achieve effective cost control with MRP planning

TRACK YOUR COSTS

- Track material and labor costs as you manage your products
- Compare estimated, planned, and standard production costs to actual costs of production

Inventory ID	Description	Source	Warehouse	Base Qty	ActDate	Promise Date	Preferred Vendor ID	Type	Reference Nbr

MANUFACTURING MANAGEMENT FEATURES AND CAPABILITIES

Estimating	Create estimates for new or existing items. Convert them into bills of materials, production orders, and/or other estimates.
Product Configurator	Use this multi-level, dimensional, rules-based system with non-hierarchical feature selections and configuration evaluation on quotes, sales orders, and/or production orders with real-time price and cost rollup.
Advanced Planning and Scheduling	Manage and monitor your shop floor schedule and work center capacity, both finite and infinite. The system includes what-if planning capability, available-to-promise, and the ability to schedule employee and/or machine resources.
Project Manufacturing	Manufacture to a project and track all associated costs at the project task level. Compare actual costs to a user-established budget. Production orders can be tied directly as a task to a project or produced to stock.
Engineering Change Control	Automate, control, and organize all change requests, plans, and actual changes to a bill of materials. Exercise full control from engineering change request to engineering change order to engineering change notice with approvals throughout each step in the process.

The Manufacturing Management components integrate completely with each other and with all other Acumatica business management products.

JAMS for Acumatica Integration

THE ACUMATICA ERP DIFFERENCE

Acumatica delivers a full suite of integrated business management applications unlike any other ERP solution on the market today.

STREAMLINE OPERATIONS

Manage your business more efficiently:

- Automate processes
- Control workflows
- Access the system from anywhere on any device— including mobile
- Promote collaboration with all-inclusive user licensing

ADAPTABLE SOLUTION

Add and extend:

- Deploy in-house or in a private or public cloud
- Easily configure your solution to fit your needs
- Add capabilities such as CRM or data visualization at any time
- Extend to other solutions and applications beyond ERP

YOUR BUSINESS ACCELERATED

Get a single version of the truth:

- Accelerate business performance and make smarter decisions with automated processes, real-time data collection, financial analyses, and forecasting
- No per user pricing – system scales as your business grows
